

CRYOVAC®

BRAND FOOD PACKAGING

Darfresh® Film

CRYOVAC® brand Darfresh® film is ideal for a variety of merchandising presentations because of its excellent optics and high or low oxygen-barrier properties. This vacuum skin film preserves the color, flavor and integrity of the product it envelops and is available in an assortment of packaging configurations.

BENEFITS

Operational Efficiency

- Compatible with multiple packaging substrates, including semi-rigid or flexible forming webs, or pre-made trays
- Efficiently package protein products of assorted sizes, portions and quantities
- Achieve better utilization of shelf, shipping and storage space
- Helps reduce off-line leakers and rework as a result of improved sealing capabilities

Product Integrity

- Minimize spoilage by having a tight vacuum skin film with a high oxygen barrier
- Reduce risk of cross contamination with a leak-proof hermetic seal
- Extend shelf-life, maintain freshness and reduce food waste with exceptional barrier and seal integrity
- Protect against freezer burn with tight vacuum skin film
- Available in a range of barrier to non barrier films to help protect and extend product life.

Brand Experience

- Support sales with striking 3D presentation
- Leverage printing and design opportunities
- Vertically merchandise with no product movement
- Easy-open feature available for added consumer convenience

CHALLENGE

With today's hectic and ever-changing lifestyle, consumer needs have shifted to convenient and transparent packaging. In fact, 38% of consumers state that the ability to see the contents in a package would drive them to purchase one product over another. As a result, having enticing food packaging is now more important than ever.

SOLUTION

CRYOVAC® brand Darfresh® vacuum skin packaging combines a clear, highly formable top film with your choice of bottom carrier in an assortment of sizes and substrate options to customize your offering. In addition, this innovative packaging solution allows you to position your product as premium, while giving your consumers the transparency and convenience they're looking for.

Increased sustainable total package options available when combined with our plant-based rollstock, our Darfresh® on Board solution that is curbside recyclable or our Darfresh® on tray which uses a VSP tray designed for recycling* and is also available with PCR content.
