

CRYOVAC®

BRAND FOOD PACKAGING

Preformed VSP Trays

CRYOVAC® brand vacuum skin trays are made from polypropylene (PP) material, creating a case ready solution that can help extend shelf life while increasing production efficiencies.

BENEFITS

Operational Efficiency

- Efficiently package protein products of assorted sizes, portions and quantities
- Customize your offerings and choose from a wide range of sizes and tray configurations in an assortment of colors
- Proven to be compatible with a variety of tray/skin and VSP equipment
- Engineered for high speeds, including denesting, machine handling and boxing operations.
- Substantially reduces processor labor costs

Product Integrity

- Exceptional oxygen and moisture barrier properties
- Hermetically sealed to provide additional shelf life and reduce in-store labor while virtually eliminating leakers
- Extends shelf life
- Final packaged product is leakproof and freezer ready when paired with CRYOVAC® brand Darfresh® film

Brand Experience

- Available with proprietary easy-open sealant for added consumer convenience
- Prevent food waste while reducing your environmental footprint by using post-consumer recycled content
- When paired with CRYOVAC® brand Darfresh® film, the finished product can be vertically merchandised with no product movement
- Eliminates the need for messy absorbent pad

CHALLENGE

As a food processor, your output is everything. It's what makes or breaks your bottom line. However, providing a solution that not only improves your operational efficiencies but also meets the growing needs of your customers is now more than ever the key to your success. With today's hectic and ever-changing lifestyle, consumer needs have shifted. In fact, 53% of consumers state they prefer prepackaged options over full-service because it's quicker, reduces their wait time and is hassle-free. As a result, case ready packaging is now more important than ever.

SOLUTION

Our CRYOVAC® brand assortment of preformed VSP trays are made from a high barrier, polypropylene material that can help extend shelf life while increasing production efficiencies. Hermetically sealed with CRYOVAC® brand Darfresh® vacuum skin film, the final output is a leak-proof, freezer ready package that is visually appealing to consumers.

Available in an assortment of recyclable or post-consumer recycled (PCR) content configurations, for a premium sustainable solution.
