

SEE[®] Brand Coffee Pouch

Keep your beans as fresh as the day they were packed.

SEE® Brand Coffee Pouch

Keep your beans as fresh as the day they were packed.

BENEFITS

Our coffee pouches come with a one-way degassing valve as standard, allowing the release of carbon dioxide from roasted beans without compromising the coffee's quality. This sleek feature can be placed on the front or back of the pouch, complementing your brand designs. High barrier laminates provide exceptional protection against moisture, oxygen, and light, helping to extend the product's shelf life. By incorporating a zipper, the coffee packaging can be easily resealed for later use, preserving freshness. By integrating a degassing valve into our standard packaging, your coffee can be packed right after roasting.

Keep your beans fresh, just like the day they were packed, with our innovative venting coffee pouch.

- Product freshness is ensured with resealable zippers.
- Easily open packaging with an easy open tear notch.
- Maintain coffee freshness with a one-way degassing valve to allow degassing within the bag while keeping oxygen out.
- Use Food Grade Materials produced in BRC accredited facility for high quality products.

MATERIALS

- Multi-layer laminates using materials such as OPP / CPP / PET / PE / PP / NY / ALU / MetPET.
- Sizes ranging from 100g to 2.5kg.
- Available in a matt, gloss, de-metalized, unprinted, and registered matt finish.
- Offers oxygen, moisture, and light barriers to protect products integrity.
- Suitable for hot and cold filling and vacuum sealing.
- Can be filled and heat sealed in line or by hand.
- Digital print up to 5 colours from 1,000 units or flexographic and gravure print up to 9 colours from 20,000 units.
