

Autobag®

BRAND AUTOMATED SYSTEMS

eCommerce Mailer Bags

AUTOBAG® Brand eCommerce Mailer Films are specifically engineered for ecommerce order fulfillment applications. With a variety of unique material solutions, you can select the best option for your custom packaging applications. Available in plain and printed formats.

BENEFITS

Operational Efficiency

- Consistent bag opening and sealing improves throughput
- Bags-on-a-roll and/or in a box reduces amount of manual labor and increases productivity in packing operation
- ProGap technology enables a wider bag opening for easier product loading, while a special polymer technology reduces static buildup

Product Integrity

- Superior strength and reinforced side seals protects against splitting and loss of goods during transit

Brand Experience

- Product arrives in a neat, professional package, enhancing customer satisfaction
- Optional two-way shipping capability available with a self-seal return strip for added consumer convenience and reduced waste
- Custom print options available to enhance brand experience

CHALLENGE

Now more than ever, your operational performance is everything, it's what makes or breaks your bottom line. The key however, is to provide a solution that not only improves your operational efficiencies but also meets the growing needs of your ecommerce customers.

SOLUTION

AUTOBAG® Brand eCommerce mailer bags are available in a wide range of gauges and material configurations in plain and printed formats to fit your unique packaging needs. When paired with an AUTOBAG system this total solution offers improved speed, versatility, and productivity without adding labor. This innovative system offering can improve your operations by helping you transition from a manual to a more automated process.
