

Inflatable Packaging Just Got Versatile

Introducing the **NEW** Bubble Wrap® brand universal inflation system BWI-1001

Inflate your packaging potential with the new Bubble Wrap® brand universal inflation system. From the packaging experts you know and trust at Sealed Air, comes the latest innovation in inflatable packaging. The BWI-1001 will immediately transform your operation to optimise labour, meet growing and changing business needs, reduce packing errors, and increase operational efficiency.

1 INFLATOR, OVER 80 TYPES OF PACKAGING MATERIALS

Key Benefits

VERSATILE

On-demand inflation of SEALED AIR® brand and BUBBLE WRAP® brand materials such as cushioning, pouches and air pillows. Effortlessly switch from one material type to another based on your needs.

RESPONSIBLE

Films are available which include recycled materials - thin yet strong with reduced dependence on virgin-based resins.

SMART

Smart technology automatically detects and configures the machine to the right seal temperature, airflow, and pressure based on the material loaded — no programming required.

ERROR-FREE

No training is required. Automatic system configuration alleviates the need for operator interaction and reduces the risk of operator error, which helps with quality control and mitigates consumer complaints.

ADAPTABLE

Ideal for a broad range of markets and packing environments, from ship-from-store to e-commerce fulfilment centres.

COMPACT

Frees up space and integrates easily into work cells.
