

Instapak® Foam Packaging

SIMPLE FACTS ABOUT FOAM-IN-PLACE PACKAGING AND THE ENVIRONMENT

The cushions protecting this product are made of Instapak® polyurethane packaging foam, a material that minimizes the amount of packaging used without compromising the protection of shipped goods. Instapak® packaging complies with international legislation restricting the presence of heavy metals.

Source Reduction

Instapak® foam has superior cushioning abilities that provide maximum protection with a minimum of material. Less packaging is used, so less enters the waste stream.

Reuse

Instapak® foam cushions can be reused for multiple shipments or reshaped manually into carton fillers to fit the next product shipped.

Instapak® Foam Return Program

Instapak® foam can be returned to the sites listed on the reverse side of this card. All returned foam is diverted from the landfill and efficiently transported to local Waste-to-Energy facilities. Please follow the following steps to return your Instapak® foam:

For parcel sized shipments, please send the cushions prepaid (COD's will not be accepted) to the location on the back side of this card that is closest to you. The shipment should be addressed to Attn: Foam Return Program. For LTL or larger sized shipments, or if you prefer to drop the material off in person, please email the location closest to you to schedule a drop off time.

Instapak® foam may be bagged, baled or boxed. The foam must be clean, dry and not adhered to any corrugated cardboard material. Using Instapak® foam to protect products makes good environmental sense. For more information about Instapak® foam, please call Sealed Air's toll-free general environmental information number:
