UK Gender Pay Reporting Statement
April 2018

Sealed Air is committed to diversity and inclusion and to promoting equal opportunities for all. We take these commitments seriously. In 2018 the UK business launched the Sealed Air Women’s Initiative Network (WIN) which aims to promote gender diversity by supporting an inclusive culture for both men and women. The UK based WIN team promotes the key pillars of the program – attract, retain and advance women to improve company diversity, inclusion and performance. It's all about helping to meet our goals of developing a high-performance organisation.

Under UK law (effective from April 2017), employers with more than 250 employees are required to publish certain data about gender pay. Our data is set out in this report.

The gender pay gap relates to differences in average male and female pay within an employer. It does not compare the pay received by men and women for doing the same work or work of equal value (known as equal pay).

Assessing our gender pay data indicates that the difference in average pay is due to proportionately more men being in senior, higher paid roles. At April 2018, our total female workforce in the UK stood at approximately 22%, an improvement of 2% on the previous year. Like many organisations in our industry and sector we would like this figure to be much higher.

We are confident that men and women are paid equally for doing equivalent jobs across our business. Sealed Air promotes equality in reward packages for men and women doing the same or similar job. To assist with this we operate a banding system for all positions which ensures consistency of salaries benefits and bonuses being equal within the bands. As the Women’s Initiative Network evolves we expect to see continued improvements in the below data.

Pay Information

Difference in mean hourly rate of pay between male and female employees 10.4%
Difference in median hourly rate of pay between male and female employees 26.9%

Hourly Rate Quartiles

<table>
<thead>
<tr>
<th>Gender</th>
